

THE ONE STOP SOLUTION FOR YOUR DATA GOVERNANCE & QUALITY

Focus on what's important

Quickly address the critical data assets

Data Quality & Security

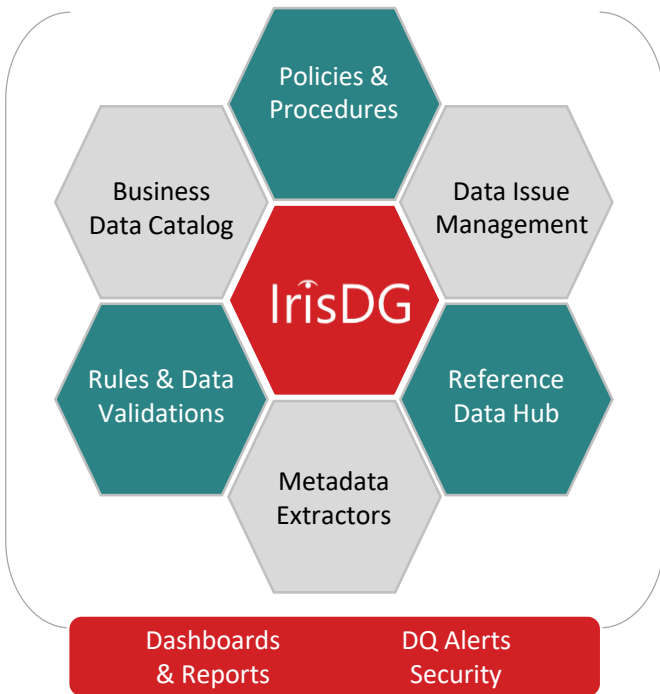

Clean, secure and trusted data

Improve Margins

Make better decisions with good data

Risk & Compliance

Avoid penalties, be on time

Situation:

Organizations have several members / teams helping with

- Managing data that drive critical business processes
- Data spread out in multiple systems, often in siloes
- Generating operational and strategic reports
- Cleaning, validating and maintaining important data

Challenge:

Business and IT teams struggle with

- “Boil the ocean”— approach to data governance
- Manual, effort intensive work that locks up resources
- Identifying critical data and where it resides
- Don’t know the full impact of changes
- Incorrect and incomplete data sets
- Rigid software systems that take months to respond

Solution: IrisDG – Data Governance Platform

Move quickly and overcome your data challenges

- ✓ Complete solution backed by Data Management experts
